

ANTIOXIDANT DEFENSE

AS WE BREATHE IN OXYGEN, OUR BODIES ARE CREATING DAMAGING FREE RADICALS AT THE CELLULAR LEVEL. HOW DOES THIS WORK? THINK OF AN APPLE. IF YOU SLICE IT UP, THE OXYGEN IN THE AIR BEGINS TO TURN IT BROWN. OUR CELLS ARE ALSO DAMAGED WHEN EXPOSED TO OXYGEN. THIS CELL DAMAGE LEADS TO MANY OF THE HEALTH CONCERNS WE SEE IN TODAY'S SOCIETY. OF COURSE, WE ALL KNOW WE NEED THIS SAME OXYGEN TO LIVE. SO HOW DO WE RESOLVE THIS DILEMMA? LET'S GO BACK TO THE APPLE. IF YOU SQUEEZE LEMON JUICE ON THE APPLE SLICES, THEY ARE PROTECTED AND DO NOT TURN BROWN, DUE TO THE ANTIOXIDANT EFFECTS OF VITAMIN C. LIKEWISE, ANTIOXIDANTS PROTECT OUR BODIES FROM CELL DAMAGING FREE RADICALS.

WHAT DO ANTIOXIDANTS DO?

Fight diseases, Promote good health, Boost energy, Slow aging

TYPES OF ANTIOXIDANTS

- Primary Antioxidants, Glutathione, & SOD, are produced by the body, with the proper diet. They stay in the body and protect cells 24 hours a day.
- Secondary antioxidants are found in food and need to be ingested every day. They give a rush of protection when ingested. Examples include vitamins A, C, E and juice products.

Primary antioxidants are the most powerful. For example, if a group of secondary antioxidants had an ORAC score of 1,000, a comparable group of primary antioxidants would have a 100 times the antioxidant fighting power with an S-ORAC score of over 100,000.

SOURCES OF ANTIOXIDANTS

Some people think that they can get the nutrition their body needs just in the food they eat. However, in today's world where food is over cooked, fast food is common and lifestyles are hectic, many people just don't get the nutrition they need for optimal health.

Many people try to address this problem by drinking a fruit juice high in antioxidants. But a single super fruit cannot provide the wide range or variety of antioxidants necessary for good health.

There are thousands of different types of free radicals. Each causes specific damage to different areas of the body. Various super fruits—such as acai, mangosteen, goji berry, noni, pomegranate, and grapes—are excellent for a specific type of free radicals, but not for all of them. For optimal protection, you need a wide variety of antioxidants (from different fruits) to combat all types of free radicals.

However, even a blended juice drink only provides secondary antioxidants because primary antioxidants must be made by the body. To insure that your body has high levels of primary antioxidants, you must have the proper nutrients required to make them.

ADAPTOGENS

The body requires complete harmony and balance in order to properly absorb nutrients. Adaptogens are natural herbs that help balance and regulate the body. A balanced body accepts and uses the nutritional support it receives more efficiently and effectively. By balancing the body (the Ying and Yang), Adaptogens allow the body to heal and promote optimal health and well-being.

Adaptogens are used to increase the body's resistance to stress, trauma, anxiety and fatigue. These herbs help balance endocrine hormones, support the immune system, increase vital energy, and help the body maintain optimal homeostasis. Adaptogens allow the body to accept and use the nutritional support it gets more efficiently and effectively.

SYNERGY

According to Webster's Dictionary, synergy is the interaction of two or more agents or forces so that their combined effect is greater than their individual effects. Rather than relying on one fruit, no matter how beneficial, Xyngular has taken nutrition to the next level by using the latest scientific nutritional technology to combine the most powerful, nutrient dense fruits known with primary antioxidant precursors and herbal adaptogens. This strategic combination causes a synergy that multiplies the effectiveness of all three.

We call this our tri-phasic approach to nutritional and physical well being and it will give your body the ammunition it needs to defend itself against the diseases related to aging. Try Xyngular. No matter what you are currently taking, we guarantee you will feel a difference.

XYNGULAR SUPER FRUIT GLOBAL BLEND

Utilizing the latest nutritional science, Xyngular has created a complete nutritional supplement juice formula. Xyngular Super Fruit Global Blend delivers nutritional support with three major types of nutrients: antioxidant-rich super fruits, critical primary-antioxidant promoting nutrients, and an herbal blend of adaptogens.

Xyngular Super Fruit Global Blend gives you:

- Powerful super fruit juices (rich in antioxidants, polyphenols, anthocyanins, and phyto-nutrients)
- Critical Primary Antioxidant-promoting Nutrients (the body needs these to produce primary antioxidants, which protect your body 24 hours a day)
- Unique blend of Adaptogens (herbs that help balance hormones, increase energy, and help you use antioxidants effectively)

Powerful super fruit juices

Xyngular has selected the most powerful super fruits from around the globe with a comprehensive variety of antioxidants to fight and neutralize all types of free radicals. Xyngular Super Fruit Global Blend gives you comprehensive overall protection.

Critical Primary Antioxidant-promoting Nutrients

Xyngular delivers the critical nutrients your body needs to produce primary antioxidants. These primary antioxidants then protect your body 24 hours a day, neutralizing free radicals as they are created at the cellular level.

Herbal Adaptogens

Xyngular's unique blend of Adaptogens balance and normalize the body, insuring that your body can absorb and utilize the nutrients provided in the Xyngular Super Fruit Global Blend. Used by herbalists for thousands of years, Adaptogens offset the damaging effects of stress, pollution, aging, and today's active lifestyle.
